Profile

Senior Software Engineer and Teamcenter PLM Consultant with 5+ years of experience delivering enterprise PLM solutions across global manufacturing environments. Experienced in Teamcenter architecture, administration, customization, integration, and performance optimization with expertise in BMIDE, ITK, Active Workspace, Workflow Management, NX Integration, and Manufacturing Process Planning (MPP).
Proven track record of improving platform performance, reducing operational overhead, and delivering scalable solutions aligned with business objectives. Skilled in stakeholder collaboration, production support governance, system modernization, and end-to-end PLM solution delivery.

Skills

Testing & Quality
UAT Testing
Functional testing
Regression Testing
Load Testing
Smoke Testing

PLM Platforms
Siemens Teamcenter - 2T/4T
Active Workspace

Integration
NX Integration
IMM Integration

Administration
Installation
Patching
upgrade
Access Control
Performance Tuning

Customization
BMIDE
ITK
Stylesheet Rendering

Programming
C
C++
SQL
Batch Script

Achievements

• Improved Active Workspace performance by 45% through targeted optimization initiatives
• Reduced recurring production incidents by 28% through proactive monitoring and issue resolution
• Delivered workflow improvements generating approximately $15,000 annual operational savings
• Supported enterprise PLM ecosystem serving 1,000+ global users
• Awarded Knowledge Champion (FY24 & FY25) for exceptional technical contribution and knowledge sharing

Professional Experience

Senior Software Engineer, *HCL TECHNOLOGIES LIMITED* 2025 Nov – Present
Nagpur, Maharastra

• Leading enterprise PLM transformation initiatives across Siemens Teamcenter ecosystems
• Driving performance optimization strategies resulting in measurable platform responsiveness improvements
• Collaborating with cross-functional engineering and infrastructure teams to align technical solutions with business objectives
• Mentoring junior engineers and contributing to architectural decision-making
• Owning end-to-end delivery accountability including implementation, governance, and production stabilization

Software Engineer, *HCL TECHNOLOGIES LIMITED* 2021 Sep – 2025 Oct
Nagpur, Maharastra

- Provided L2 and L3 offshore support for Siemens Teamcenter, resolving **200+ customer queries per month** across multiple global regions within a **24-hour SLA**.
- Troubleshot and resolved issues related to Teamcenter architecture, Administration, Active Workspace (AWC), workflow configuration, and data model customization.
- Managed attribute configuration, access control, and workflow enhancements to meet business requirements.
- Supported system integrations and handled technical issue analysis, root cause identification, and performance-related concerns.
- Contributed to Teamcenter implementation and customization activities during training phase, building foundational expertise in BMIDE and ITK-based enhancements.
- Collaborated with cross-functional teams in Agile environments, ensuring timely defect resolution and deployment support.

Projects

Enterprise PLM Optimization Program – Caterpillar, *Caterpillar* 2022 Jan – Present

- Developed a **Batch script** to automate the **user addition process** to the license file, significantly reducing manual effort and errors.
- Introduced an efficient approach for **data collection** required to provision **Teamcenter access**, improving overall onboarding time.
- Conducted **accountability checks** and effectively managed **EBOM to MBOM transitions** using **Manufacturing Process Planner (MPP)**.
- Ensured timely and effective resolutions to user queries received via **ServiceNow**, consistently maintaining SLA standards.
- Updated the **support process** and managed comprehensive **training documentation** for end users to enhance self-service capabilities.
- Maintained and monitored **vulnerable servers**, addressing risks proactively to support system security and stability.
- Provided technical support and troubleshooting for Siemens Teamcenter PLM across multiple user environments, ensuring seamless performance and minimal downtime.
- Managed and optimized configuration management and workflow processes within Active Workspace (AWC), improving efficiency and user experience by 20%.

- Actively monitored **production and testing environments**, enabling early detection and resolution of system issues.
- **Redesigned the user support process**, streamlining operations and improving accuracy—resulting in a **cost saving of $15,000**. Also revamped the **user creation process** to enable more **efficient and accurate provisioning**.

Teamcenter Integration & Governance Enablement – Internal COE, *Internal COE*

• Analyzed **compatibility matrix** to assess and support the deployment of new features in Teamcenter.

- Performed **patch upgrades** and regular maintenance for Teamcenter environments.
- Installed **Siemens NX** and successfully executed **NX-Teamcenter integration**, including role-based preference configuration.
- Independently deployed the **Integrated Material Management (IMM)** module within Teamcenter.
- Conducted multiple testing cycles including **Functional Testing, User Acceptance Testing (UAT), Smoke Testing, Regression Testing**, and **Black Box Testing** for the IMM module deployment.
- Developed **ITK scripts** for automation tasks such as **item creation, dataset creation, and autologin functionality**.
- Configured **Stylesheets** to generate custom properties in the material creation template, enhancing UI/UX and data accuracy.

Active Workspace Performance Engineering – Harman, *Harman*

- Collected and documented hardware specifications of all servers to evaluate their capability to handle expected user load.
- Performed load testing and captured performance metrics during key User Acceptance Testing (UAT) scenarios.
- Contributed to performance optimization by reducing the response time for the "Where Used" report in Active Workspace Client (AWC), enhancing overall user efficiency.

Certificates

Product Lifecycle Management

C,C++
Completed 6 month training course

Static, Dynamic, Black-box & white-box testing

Awards

Knowledge Champion, *HCL*
Awarded knowledge champion for FY24

Knowledge champion, HCL
Awarded Knowledge champion for FY25

Education

Bachelor of Technology, *Lakshmi Narain College of Technology & Science*
Honours in Electronics and Communication.

2017 – 2021
Bhopal, Madhya Pradesh

Languages

- English
- Hindi
- French

Organizations

Gramiksha, *Student Volunteer* Bhopal, Madhya Pradesh

Aashman Foundation, *Recruiter* Remote
Listing jobs over several platform, streamlining interview, assisting with onboarding process.
